

ICYNENE MD-R-200™

A Revolution in Medium Density Spray Foam Insulation and Air Barrier Materials

Featuring recycled content, ICYNENE MD-R-200 allows a building to be insulated and air-sealed for superior energy conservation while minimizing environmental impact.

Key Benefits vs. Light Density Spray Foam Insulation:

- High R-value per inch;
- Higher compressive strength;
- Higher tensile strength; and
- Lower vapor permeance.

Delivering Advancements in Medium Density Spray Foam Insulation

ICYNENE MD-R-200 can be applied on a variety of substrates under a range of temperature and humidity conditions.

- Contains up to 12.6% recycled plastic in the MD-R-200 resin.
- A Low-Emitting Material (LEM) as per CHPS EQ 2.2 Section 01350 (Collaborative for High Performance Schools).

Fulfilling Choices

Icynene offers fulfilling solutions through a portfolio of advanced and responsible building envelope products that anticipate changing design requirements, market conditions and customer needs.

Ideal For Residential and Commercial Applications, Icynene Solutions Provide:

Increased Energy Efficiency

Icynene products give you both insulating R-value and air barrier performance – allowing you to minimize 2 major sources of heat loss/gain. The result can be a reduction in heating and cooling costs of up to 50%.

Improved Indoor Air Quality

Icynene's air-sealing capabilities minimizes the entry of airborne irritants such as allergens, drafts or humidity. Combined with proper mechanical ventilation, Icynene products assist occupants in controlling the quality of the indoor air that they breathe.

Contribution to LEED points

Icynene spray foam insulation solutions are vital contributors towards a home or building obtaining critical LEED (Leadership in Energy and Environmental Design) points.

Always refer to the specification sheets on Icynene.com for the most current information on the complete portfolio of Icynene products.
